Q: What are the specific epidemic prevention measures at the exhibition site?

A:

1. All personnel must register under real name authentication online in advance. The organizer will not accept persons from areas with high epidemic risk to register for participation in the exhibition or enter the exhibition hall.
2. The organizer and the exhibition hall will be equipped with necessary anti-epidemic materials. During the exhibition, the main entrances and exits of each hall will be equipped with alcohol-free hand sanitizer for disinfection by exhibitors and visitors.
3. Perform regular and main disinfection on all high-frequency contact areas.
4. Organizers, exhibitors, contractors, freight forwarder and other onsite personnel must implement a daily health registration system in addition to the normal work procedures for entering the venue. The health status of the staff must be summarized daily, and the staff in key areas must be confirmed in advance. If there is any abnormal health condition, please inform the organizer in time. All front-line staff must wear masks uniformly.

Q: Do I need to wear a mask in the exhibition hall?

A: All personnel entering the hall must wear masks, maintain a safe social distance of 1 meter, avoid gathering or crowding, and reduce physical contact. Specific rubbish bins for disposal of used face masks are provided at prominent areas.

Q: How to ensure air ventilation at the exhibition hall?

A: In order to ensure air ventilation in all areas of the exhibition hall, the entrances and exits of the exhibition hall will always be open.

Q: What epidemic prevention measures will EXHIBITOR take at the exhibition site?

A:

1. Exhibitors must prepare anti-epidemic and disinfection items such as masks, disposable gloves, disinfectant water, and hand sanitizers for their booths.
2. In addition to going through the normal work procedures for entering the exhibition, all participants in the trade show, and their contractors, forwarders and other exhibition service personnel also need to conduct routine training on infectious disease prevention knowledge for their employees and suppliers and service providers to ensure that the employees are admitted Master the necessary prevention and control knowledge and service skills such as disinfection and cleaning. Establish work accounts such as employee health files and personnel control records to strengthen work management. Collect employee health monitoring information daily and keep records. If there is any abnormality, report to the organizer in time. Staff in key areas must confirm their health in advance, and inform the organizer in time if there is any abnormality.
3. Exhibitors should ensure that the meeting area is ventilated and spacious. Customers and sales personnel must wear masks keep a safe social distance. The organizer strictly forbids exhibitors to carry out crowd performance activities, such as promotion activities, should ensure that the booth crowds are kept at a safe distance.
4. Exhibitors must strictly implement preventive disinfection and daily disinfection of their booths and exhibits, and keep records of disinfection work. Cooperate with the organizers and venues to do preventive disinfection and daily disinfection work in public areas. All personnel entering the exhibition area use hand sanitizer to wash their hands. Exhibitors should report to the on-site epidemic prevention and control personnel if they find that the temperature of the visitors in their booth is abnormal.
